

SERVICE AND AFTERMARKET SOLUTIONS

FOR VOC AND HAP CONTROL SYSTEMS

SUPERIOR EXPERTISE MEANS SUPERIOR PERFORMANCE AND VALUE

Availability, timely response, reliability, performance... you need all this from a company to make sure that your VOC and HAP control systems run efficiently. And this is what NESTEC brings to every project. We have built a nationwide team of certified contractors and suppliers to ensure that every aspect of your project goes smoothly. From installation to start-up to ongoing maintenance and support, NESTEC is the reliable source for your process, equipment and training requirements, 24 / 7, 365 days a year.

- ▶ Start-up and training, including safety training
- ▶ Equipment inspection and installation
- ▶ Process evaluations
- ▶ Control equipment recommendations
- ▶ Comprehensive maintenance programs
- ▶ Large spare parts inventory
- ▶ Project management services
- ▶ System rebuild and optimization
- ▶ System upgrades and repairs
- ▶ Utility reviews and optimization
- ▶ Refurbished equipment

People — Our Greatest Resource

With over 300 years of combined experience in the environmental field, NESTEC's highly skilled engineers, technicians and customer service personnel can support all of your project needs, from initial system design to installation to ongoing maintenance...a true turnkey service you can count on!

MAINTENANCE PROGRAMS

Yearly maintenance contracts are available and come with comprehensive reports and system repair recommendations.

INSPECTION AND INSTALLATION SERVICES

Certified service technicians experienced in the field of thermal oxidation are used for all projects and are available for inspection and parts installation services.

REFURBISHED EQUIPMENT

NESTEC's scope of work in this area includes purchase and resale, construction coordination, waste disposal, verifying flow and process conditions, and system reengineering for maximum performance and efficiency.

SPARE PARTS

We keep a large inventory for oxidizers manufactured by any company, including proximity switches, thermocouples, discreet controllers, gaskets and sealant, and actuator repair kits. All parts and labor come with a full one-year warranty.

REPAIRS AND MAINTENANCE

NESTEC offers 24-hour service and response to support our customers, with service technicians available nationwide to answer questions and travel to a site at a moment's notice.

PROCESS EVALUATIONS

NESTEC will review criteria such as required VOC removal, VOC type and loading, particulate type, gas flow rate, moisture content and gas temperature to provide you with the right technology choice for any type of oxidation system.

UTILITY REVIEWS AND OPTIMIZATION

NESTEC provides burner maintenance, service and component upgrades to optimize burner turndown to minimize gas consumption. We will also select the most cost-effective heat recovery material to minimize electrical consumption.

START-UP AND TRAINING SERVICES

We provide comprehensive training for operation and inspection, including site safety training to meet federal and state regulations.

PROJECT MANAGEMENT SERVICES

NESTEC offers oversight services for aftermarket and system upgrade projects. Our expertise includes HAZOP review, vendor coordination and material purchases.

SYSTEM REBUILD AND OPTIMIZATION

Our experienced design engineers will supply proven options for your oxidation system, such as processing higher volumes, changing chemistry and throughput, or increasing energy savings.
